

SELKO ARCTIC WORLD

WHITEPAPER | VERSION 1.0 | OCTOBER 2026

Small flippers. Big adventures.

A community-first Arctic entertainment project with a live Solana token and free-to-play experiences. This document is informational, not investment advice.

1. Our mission

SELKO celebrates Arctic wildlife, playful exploration and accessible creativity. The website is designed to be useful and enjoyable without purchasing a token. No guaranteed profit, yield or price appreciation is offered.

2. What exists today

SELKO Arctic World includes three free browser arcade games (Aurora Dash, Ice Cave Adventure and Aurora Flight), a postcard maker, a downloadable free Arctic Passport, Arctic learning content and a basic crypto safety quiz. The site is a browser experience, not a decentralized protocol or audited financial application.

3. Token and how to find it

SELKO is live on Solana through pump.fun. Official mint address:

9hfnnMtV6XLMRevABq9DaszowCkKFjoPptFVfVoKpump. Official token page:

<https://pump.fun/coin/9hfnnMtV6XLMRevABq9DaszowCkKFjoPptFVfVoKpump>. The mint address identifies the token; do not send SOL to the mint address. Supply and current holder distribution should be verified independently on-chain rather than inferred from promotional text.

4. Creator ownership and creator rewards

The creator made no initial token purchase. A creator-profile screenshot showed 0% creator token holdings at the time observed. This is a historical snapshot, not a lock or guarantee that the balance can never change. Under the pump.fun configuration shown, the creator account receives 100% of the creator rewards designated to that account by the platform. These are not 100% of all trading fees. There is no commitment to split creator rewards 50/50. Creator rewards may be used for project expenses and development at the creator's discretion. Public spending claims should include supporting transaction records.

5. Public addresses and accountability

Creator wallet: **65HEcHPGZsKAXjN7xE8GhL5z1inEruZDzxKg7yCLUcDk**.

Project treasury wallet: **53jEhq5XfDQ5WVppCyzWriaSZMvYUyummyRATpn2SoYc**.

These are public addresses for verification, not instructions to send money. A screenshot on 8 October 2026 showed 0.1118 SOL in unclaimed creator rewards; this is a dated observation and not evidence that the rewards were claimed. No project expenditures or liquidity additions are documented in this version.

6. Roadmap and future utility

Available now: free games, Arctic learning, postcards and free Passport.

Planned: improved gameplay, accessibility, challenges and optional leaderboards.

Future concepts: read-only token balance checks, optional cosmetic holder badges, token safety education and simple Solana payment learning tools.

Long-term ideas: moderated community artwork and challenge creation. These ideas depend on security testing, funding and community needs. They have no guaranteed timeline.

7. Wallet and security principles

The free website does not require a wallet. Optional Phantom connection currently shows a public address; it does not verify SELKO holdings or request transfers. Never share a recovery phrase. Use official token links, review wallet requests carefully and treat unknown social accounts as unverified. No claim of an independent security audit is made.

8. Risks and limitations

SELKO is a speculative crypto token. Prices can be highly volatile; users may lose all funds spent. Liquidity, exchange availability, fees and platform rules may change. There are no guaranteed profits, token-gated benefits, creator distributions, future listings or completed roadmap milestones beyond what is described as available now. No investment recommendation is made.

9. Official resources
